Abstract: This article tells about the results of the survey among students of the sports university on the relevance of studying English at the university, and also gives an example of using Internet platforms to achieve the educational goals of a student at the time of study.

320

Introduction. At sports universities, a large number of students are athletes who actively participate in competitions of the Russian and international level. Therefore, these students from their experience have repeatedly convinced of the importance of fluency in English. 65% of the surveyed students consider their level of knowledge of the English language at the Elementary level, which does not allow them to communicate in any way with a native speaker. This causes difficulties in a professional sports career, interferes with the further implementation of the athlete's potential, and also affects his results [4, 5].

In the program of the course in a foreign language at the undergraduate stage, the main goal of mastering the academic discipline "Foreign language" is to increase the initial level of proficiency in a foreign language, achieved at the
